

HIPAA Compliance

Last Modified on 12/18/2018 6:20 am EST

The Health Insurance Portability and Accountability Act (HIPAA) establishes national standards for electronic health care transactions. Patient Communicator is fully compliant with HIPAA Security Standards, and has completed an official Risk Analysis, as well as the Security Standards Compliance Program.

Patient Communicator ensures the protection of all the patient information on its systems by continuously maintaining strict enforcement of these standards. This maintenance includes:

Ensuring the confidentiality, integrity, and availability of all electronic protected health information (e-PHI) we create, receive, maintain or transmit.

- Protecting against any reasonably anticipated threats or hazards to the security or integrity of such information.
- Protecting against any reasonably anticipated uses or disclosures of such information that are not permitted or required.
- Ensuring the compliance with the Security Standards by our workforce.

Your patients' privacy is of the utmost importance to us, which is why our solution was designed from the ground up to incorporate the data security that you and your patients require.
