

Multiple Appointments on the Same Day

Last Modified on 12/30/2018 3:03 am EST

If a patient has several appointments on the same day can I send one message for all of them?

By default, your Patient Communicator will send a patient a Reminder or Confirmation request to the first appointment of the day only. A patient who confirms the first appointment will automatically confirm all other appointments for that day.

To change this setting, go to [Settings > Advanced Settings> Advanced Settings](#).
