

New OLS patient

Last Modified on 12/30/2018 5:46 am EST

If a new patient registers online, will the patient automatically appear in the PMS?

New online patients can automatically have patient records created if supported in your practice management software.

Otherwise, a patient with a -1 next to his name in the [Online Appointments](#) window on the [Homepage](#) indicates that it is a new patient.

You will the need to manually create this new patient in the Practice Management Software (PMS).

See article for [Online Patients](#) for instructions on [linking](#).
