

# Publicize your text number

Last Modified on 12/25/2018 1:57 pm EST

## How can we notify our patients that they can text us?

You can announce it on your website, Facebook, or Yelp account. Your website designer would have to create an icon or graphic that says you've gone tech friendly and patients can text your office at any time. You can also send a mass email to your current patients, announcing this feature.
