

# Opted out patient got message

Last Modified on 01/04/2019 4:43 am EST

## Why did a patient who opted out (unsubscribed), receive an automated message?

- You may have selected **Override Patient Preferences** when sending messaging from Communication Center.
  - The patient was opted out after the notification message went out.
  - The patient may have been opted out in the Practice Management Software and not in Patient Communicator.
-
